

A dense forest of tall, slender trees with green foliage, serving as the background for the left half of the page.A photograph of a modern interior space, likely a museum or gallery. The walls and ceiling are clad in vertical wood slats. The floor is made of large, light-colored stone tiles. In the foreground, there is a modern, curved, light-colored bench. In the background, there are glass display cases and a large window showing a landscape with swans.

from all over the **world**.

## EVERYTHING UNDER ONE ROOF:

Be it logs, sawn timber, veneers or profiled timber, our broad range of goods is guaranteed to offer the most suitable product for every customer, along with inspiration for new uses or materials. We always keep track of the latest trends and try to deliver the latest products to our clients.

Established in 1970, the family enterprise employs more than 250 people. BFP is one of India's largest timber companies and has been providing quality timber to customers all across India with the support of dedicated staff and patronage of its clients. BFP always strives to grow globally while giving due respect to the environment. We are continuously investing in our core competences, which is sawmilling, kiln drying and in the diversification of our business. Our vision is to achieve long-term sustainable growth as an international lumber company by adding value to customer operations with high-class products & services.

BFP takes its environmental and social responsibilities seriously. We actively support sustainable forestry and community development. BFP is also one of the first wood FSC certified companies in India, holding the FSC certificate since 2018. Ask for our FSC certified products.

## WHY CHOOSE BANSAL FOREST PRODUCTS?

### CUSTOMER SATISFACTION

70% of our new customers come from referrals which speaks volumes about our service.

### 6+ DECADES OF WOOD EXPERTISE

BFP is one of the leading Timber importers in the country and imports timber from more than 25+ origins.

### AN EYE FOR DETAIL

We took utmost care to offer high quality reliable products at a value that exceeds customer expectation.

### KEEPING IT SIMPLE

Selection of wood products can be tricky! We help you understand the application aspect of our products.

## EXOTIC WOOD

Exotic wood species are found around the world, usually coming from the more tropical areas. Some common exotic species are Mahogany, Ipe, Sapeli, Cherry, Walnut, White Oak, White Ash and many more. Exotic wood is considered to have a more striking appearance, giving off a more offbeat look. These woods are harder, denser and difficult to work with as compared to other woods. The availability can be an issue for these woods as they are a bit difficult to source and therefore come in specific sizes and cuts.

### BFP IPE® WOOD

### BFP CUMARU® WOOD

## SOFT WOOD

Softwoods are generally light, open-grained woods which are used for a wide range of applications inside the home. About 80% of all timber comes from softwood. Softwoods have a wide range of applications and are found in building components (e.g., windows, doors), furniture, medium-density fiberboard (MDF), paper, and much more. It is typically less expensive compared to hardwood and has a faster rate of growth.

**DEODAR / CEDRUS**

**ANGAR PINE**

# TEAK WOOD

Teak is one of the hardest, strongest and most durable of all timbers, highly resistant to any rotting and almost impervious to the effects of hot sun, rain, frost or snow. Teak requires little or no maintenance regardless of the environment. These characteristics combined make teak the ideal timber for all outdoor applications, and it has been the choice of boat builders for centuries. Once seen primarily on elegant yachts and in the most extravagant estates, teak wood is now a premium wood of choice for designers of hotels, corporate headquarters and upscale homes.

## LATIN / PLANTATION TEAK

## AFRICAN TEAK

## BURMA TEAK

## MP / NAGPUR TEAK

# ENGINEERED WOOD PRODUCTS

The name engineered wood meaning indicates that the wood is artificially created as opposed to occurring naturally in nature. It is generally made from the same hardwoods and softwoods used to manufacture lumber, but mixed with additives like adhesives. This type of wood often utilizes waste wood from sawmills, and are treated through chemical or heat processes to produce wood that meets size requirements that are hard to find in nature. It is used in a variety of applications, from home construction to commercial buildings to industrial products.

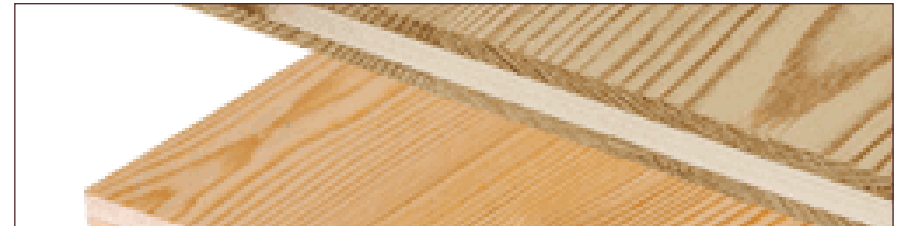

## WOOD PANELLING

## ENGINEERED WOOD FLOORING

## THREE LAYER SOFTWOOD PANEL

## BIRCH PLY

## RESPONSIBILITY TOWARDS NATURE

BFP believes that forest resources should be managed to meet the social, economic, ecological, cultural and spiritual needs of present and future generations. To achieve this, BFP sells wood products that could be traced to sources whose forest management systems are based on standards which take into account international environmental, ecological, biodiversity, social and economic needs.

BFP is one of the first wood FSC certified companies in India, holding the FSC certificate since 2018. Ask for our FSC certified products.
