Three-Layer Soft Wood Panel

Absolute top-quality made of wood. Quality monitored through ongoing research and extremely stringent controls. Environmental awareness in purchasing and processing. High functionality and easy processing. Individual design scope for kitchens, furniture, ceilings, floors, walls, doors, drawers, windowsills and lots more.

PROCESS :

All original reclaimed wood surfaces are cut as lamellas from beams, log walls and planks and are pressed into 3-layer panels. Our range of 3-layers panels offers a standardized product from original reclaimed wood surfaces that can easily be machine-processed for furniture and interior decoration.

CONCEPT :

NATURAL PRODUCTS FOR ROOM DESIGN The way these panels are made with natural materials in our product line Nature is a statement.

Wood surfaces, using special procedures, give interior design the expression of individuality, exclusivity and aesthetics with their noble character.

There is one thing our product line Nature always communicates: quality at the highest level. Integrated into modern living spaces they definitely a feeling of comfort and well-being, but also transport a natural feeling of grounding and stability.

Three-Layer Soft Wood Panel Features...

- Wide range of options for internal and external application
- Highly stable, compact and strong while relatively lightweight
- Easy to process, durable material
- Various types of surface and edge processing possible
- Natural finish, biologically healthy
- Highly durable, breathable material
- Environmentally building material - no additional formaldehyde emission

OLD WOOD SPRUCE

QUALITY -> AB

MIDDLE LAYER -> SPRUCE
